Information Security

sebastianmarquez.official@gmail.com

GitHub | LinkedIn | Website | TryHackMe | HackerRank | Hack The Box

Information security graduate student with experience in security operations. I build Windows investigation tools and use a home lab to test how network and system controls behave.

Education

California State Polytechnic University, Pomona

M.S. in Information Security | Expected June 2028

Current coursework in Fundamentals of IT Auditing and Managing Software Defined Networks.

Bachelor’s degree in Computer Information Systems · Cyber Security minor | August 2023

Selected projects

Surge · **Windows security telemetry**

Built a C++ collector that checks selected DLL code against approved hashes and records gaps in memory coverage. A Python replay tool links flagged movement in a controlled game trial to the source records cited in an investigation report.

Insight · **Reverse engineering**

Built a desktop tool for tracing Windows x64 code from Ghidra pseudocode to instructions and bytes. Compared the cooldown decision across two builds. In a separate case, matched a recorded DLL sample to its file and attached the finding in Surge.

StudyStep · **Source-linked learning**

Built a desktop app that turns notes and Wikipedia readings into practice questions. Learners can check answers against the source, edit topic assessments and review changes to followed articles.

Network security lab

Configured UFW and SSH key authentication on Ubuntu. Checked access with Nmap and Wireshark, and documented DNS and recovery exercises in an isolated Windows domain.

Security experience

Security Ops · Knott’s Berry Farm | June 2019 – July 2021

Responded to on-site safety incidents, documented witness accounts and escalated findings to park staff for follow-up investigations.

Technical skills

Programming C++, Python, PowerShell, TypeScript

Security analysis Ghidra, x64 disassembly, Windows PE inspection, Linux log analysis, Wireshark

Engineering Git, GitHub Actions, CMake, Electron, React, automated regression testing

Languages · English and Spanish
